SMART SURFACE SCIENCE

# Paint protection

Protecting your car's paintwork is where Gtechniq's core knowledge lies. Based on Smart Surface Science, Gtechniq Platinum gives your car a ceramic shield, helping to maintain its high-gloss, showroom finish for years to come.

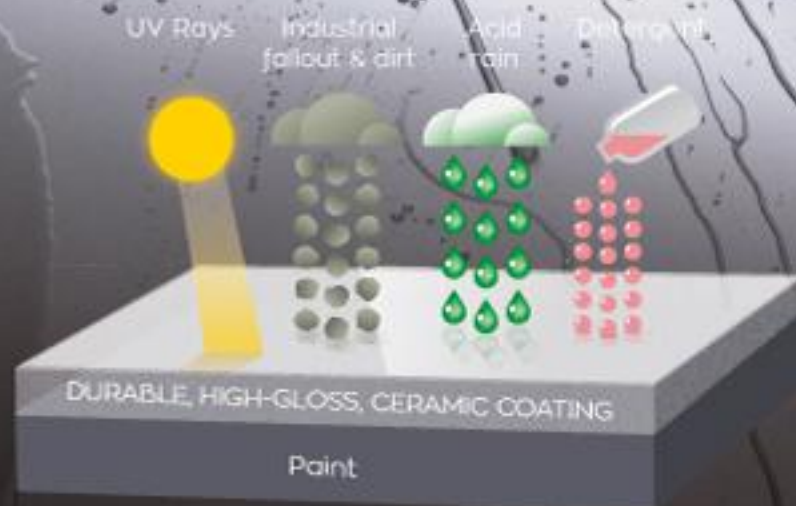

Advanced chemical nanotechnology allows the Platinum coating to form a chemical bond with your car's paintwork, so it becomes the functional surface of your vehicle. The coating gives unrivalled UV and dirt repellency, reduces swirls, and makes your car a dream to maintain.

## Unprotected

**without** Platinum protection

## Protected

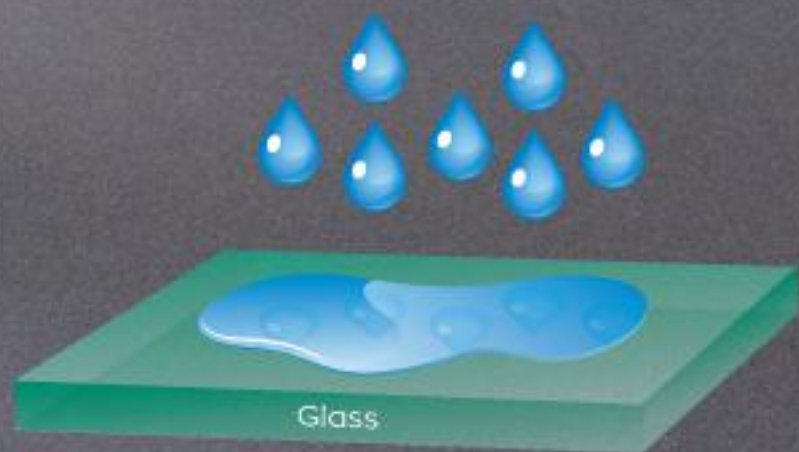

**with** Platinum protection

# Glass protection

All external windows are treated with a hydrophobic coating which is durable, optically clear and easy-to-clean. The non-stick nature of the coating makes removing bird droppings and tree sap painless. Rainwater is repelled off your windows, offering fantastic wet weather visibility, and added driving safety.

Gtechniq glass protection has been used by a number of World Rally Championship Teams to improve visibility in extreme conditions.

# Interior protection

Research suggests we spend an average of 30 hours a year stuck in traffic alone. This makes the interiors of cars subjected to conditions which can encourage the growth of microbes. Food remnants, spillages, dirt, little sticky fingers, and dust, can support the growth of microorganisms like bacteria and fungi.

Gtechniq's interior products keep leather and fabric looking newer, and smelling fresher for longer. Using Gtechniq with added BioCote® to protect your car's interior can help prevent the growth of microbes.

## Leather

On top of the Biocote® benefits, Gtechniq leather protection will reduce wear on prone areas of leather or vinyl seats, such as piping and leading edges. It also makes dye transfer from clothing easier to remove.

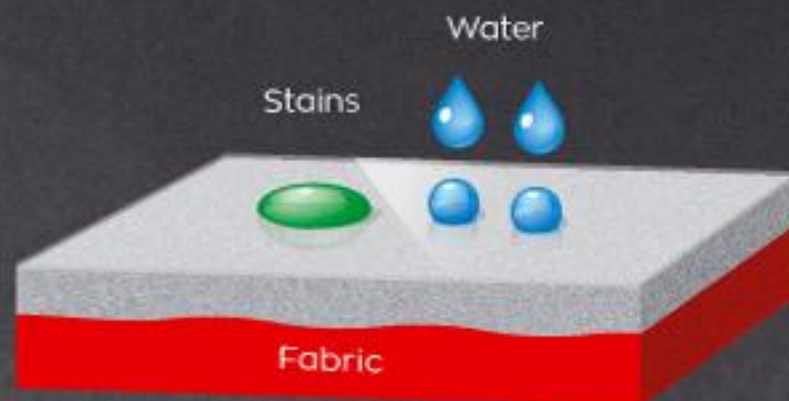

## Fabric

Fabric soiling can be reduced dramatically by using Gtechniq Platinum on the interior of your car. Spilt coffee, kids' ice creams, even coke, all simply roll off a fabric surface and can be wiped away with a damp cloth, without staining.

# What is protected?

The Gtechniq Platinum system is exclusive to car dealerships, and provides the ultimate protection for:

Paint

Glass

Interior

Wheels

## Why Gtechniq Platinum?

Gtechniq Platinum offers a scientifically tested, nano-based system of protective treatments, that outperforms anything else available.

In 2004 Gtechniq was formed out of dissatisfaction with aftermarket surface protection products for cars. Advances in chemical nanoengineering, combined with a rigorous laboratory and real world test regime, has allowed Gtechniq to create a range of innovative products. The range allows your car's surfaces - inside and out - to remain untarnished.

Trained technicians will make sure your car is treated from roof to sills, inside and out, helping to maintain its perfect showroom finish and resale value for years to come.

High-gloss, UV protection, durability and scratch resistance - there is no better protection than Gtechniq.

# Wheel protection

Independently proven to outlast other rim coatings, Gtechniq wheel protection is unique. The formula bonds with the surface of your wheels to become the functional layer. This makes them dirt and brake dust repellent, and much easier to clean. On top of that, they have an active resistance to stains and contamination.

Because of the exceptionally fine surface rheology and bonding mechanism, the Platinum wheel protection's performance is outstanding.

# With you every mile

To make sure your car retains its new look, as part of the Gtechniq Platinum service, we provide you with a **complimentary aftercare kit**, exclusive to car dealerships.

The kit contains everything you will need to protect your investment, from shampoo to bug, tar and glue removers, antibacterial wipes and wipes for the muckiest of jobs - removing bird droppings from your vehicle's surface.

Each product has been scientifically formulated to work hand-in-hand with Gtechniq coatings, providing the best durability and protection for your new car.
